# THE COURSE

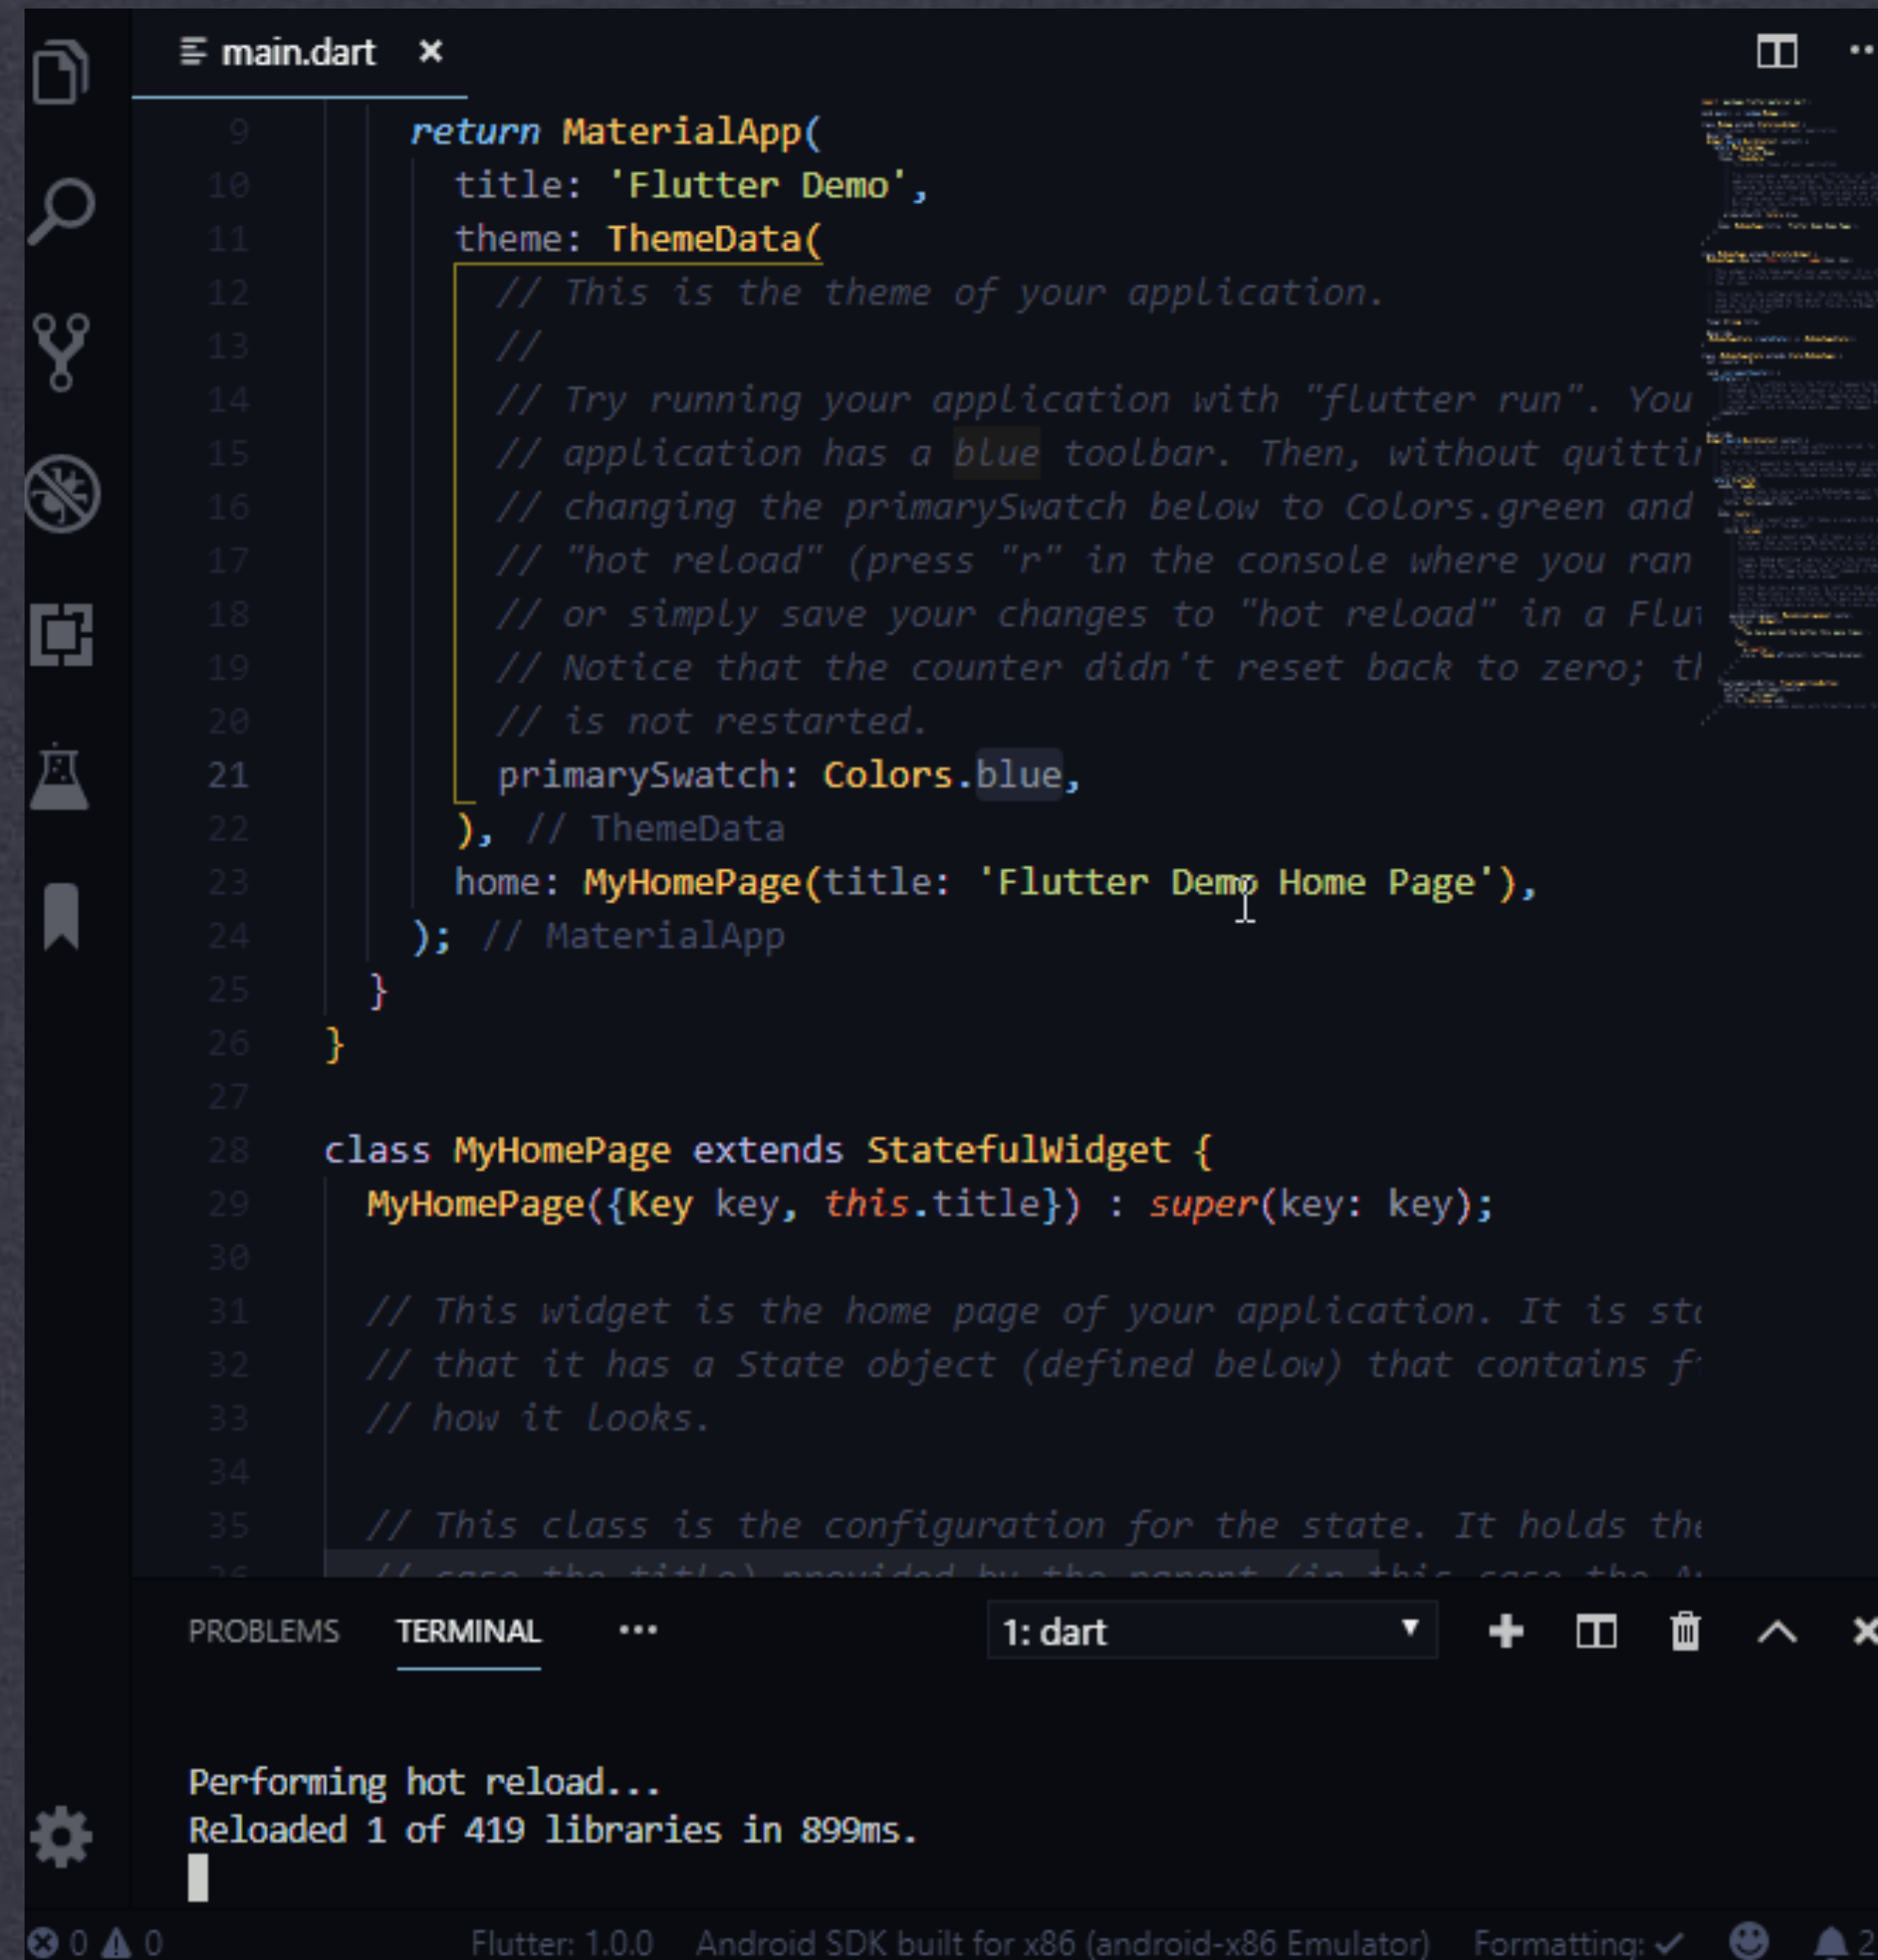

IT'S CALLED "LET'S MAKE AN APP" AND IT WAS HOSTED BY PROFESSOR LUCIANO BARESI FROM THE UNIVERSITY OF MILAN.

DURING THE COURSE, THE STUDENTS LEARNED HOW TO MAKE A MOBILE APPLICATION FROM THE BASICS.

# THE COURSE

```
9      return MaterialApp(  
10        title: 'Flutter Demo',  
11        theme: ThemeData(  
12          // This is the theme of your application.  
13          //  
14          // Try running your application with "flutter run". You  
15          // application has a blue toolbar. Then, without quitting  
16          // changing the primarySwatch below to Colors.green and  
17          // "hot reload" (press "r" in the console where you ran  
18          // or simply save your changes to "hot reload" in a Flutter  
19          // Notice that the counter didn't reset back to zero; it  
20          // is not restarted.  
21          primarySwatch: Colors.blue,  
22        ), // ThemeData  
23        home: MyHomePage(title: 'Flutter Demo Home Page'),  
24      ); // MaterialApp  
25    }  
26  }  
27  
28  class MyHomePage extends StatefulWidget {  
29    MyHomePage({Key key, this.title}) : super(key: key);  
30  
31    // This widget is the home page of your application. It is still  
32    // that it has a State object (defined below) that contains f  
33    // how it looks.  
34  
35    // This class is the configuration for the state. It holds the  
36    // app the title) provided by the parent (in this case the A
